Enable stakeholders to contribute to the governance development

A platform for information, dialogue, and development

http://eoscpilot.eu/about/governance
Direct input from stakeholders/members
  - Dialogue, meetings, statements, whitepapers

Events
  - Workshops, and webinars

...
Today’s Agenda

- Conclusions from pop-up panel discussion at ERIC meeting in Helsinki
- Conclusions from EOSC Summit
- Sneak-preview of Governance Framework straw-man
- Q&A
Conclusions of pop-up panel discussion at ERIC meeting in Helsinki
1st Panel: “Research Infrastructures expectations on the European Open Science Cloud?”

- Franciska de Jong, CLARIN ERIC
- Christine Kubiak, ECRIN ERIC
- Niklas Blomberg, Elixir
- Volker Röhling, ECCEL
- Francisco Colomer, JIVE
- Sanna Sorvari, ACTRIS ERIC

2nd Panel: “Optimal governance framework for EOSC from Research infrastructures’ point of view?”

- Ron Dekker, CESSDA ERIC
- Jan-Eric Litton, BBMRI ERIC
- Fruzsina Molnar-Gabor, EMBL
- Jonathan Taylor, ESS ERIC
- Bahne Stechmann, EU-OPENSSCREEN ERIC
EOSC could make expertise available
  Policy, technical, ways of working,…

Reuse experience from the RI cluster projects
  Organizational interoperability, practical examples of governance, leverage on existing structures

GDPR is a concern
  Very different implementations in the different countries

“ESOC should follow the principle of subsidiarity and not redo what ERICs are already successfully doing”

Full report at https://eoscpiilot.eu/about/governance-framework
EOSC Summit
Brussels
12 June 2017
EOSC Summit

- Organized by DG RTD and DG CNECT
- Commissioner Moedas
- RTD Director-General Robert-Jan Smits
- Five panels covering a number of EOSC topics including governance
Panel: Sustainable funding and Governance

- Sergio Andreozzi (OSPP EOSC Group and EGI)
- Kimmo Koski (CSC – IT Center for Science)
- Doris Wedlich (German Rat für Informationsinfrastrukturen)
- Matthew Scott (GÉANT)
We have “different types of governance and levels of governance that need to be taken into consideration”

“it will be a long-term commitment and it must be made clear how much it will cost”

“EOSC will not have a single governance”

“build trust between all different stakeholders”

call for “demand side management”

recommendation to “raise funding commitments for a 10-12 year period”

“acknowledge the merit of existing governance and funding structures established over many years in European research infrastructures and e-infrastructures”
EC ask Member States to:

- RECOGNISING the challenges of data driven research in pursuing excellent science
- GRANTING that the vision of European Open Science is that of a research data commons, widely inclusive of all disciplines and Member States, sustainable in the long-term

Member states are further asked to share a number of intents concerning the EOSC:

Governance Framework
Straw-man
The Governance framework will:

- enable and encourage engagement from the key stakeholder communities:
  - European e-Infrastructures, Data and Research Initiatives, Service and cloud providers, Research funders, Research Communities and Institutions, Research Infrastructures, Policy makers.

- enable interoperability and co-ordination within a number of different domains:
  - legal interoperability, interoperability of organisational processes, technical interoperability, operational interoperability, data and information interoperability.
Undertaken:

- Stakeholder mapping exercise
- Progressing with a framework which will help conceptualise the range of stakeholders and interoperability objectives
- Assessing different governance approaches across these, and how these may fit together.

Next Steps:

- Planning to have a draft framework for discussion late summer
  - To gather feedback from a broader community
  - Feedback initially via online tools and forum
  - Then via workshops, including EOSCpilot stakeholder event at end Nov.
The **Governance Framework** will outline **Engagement Mechanisms** needed to enable **EOSC Actors** to co-ordinate the **Engagement Aspects** required to ensure interoperability within multiple **Engagement Contexts**, according to the **Actors’ Roles within the Supply Chain**.

http://eoscpilot.eu/about/governance
Upcoming events

- 2 October in Tallinn
  - Governance development forum in conjunction with e-IRG meeting and Estonian presidency
- Monthly webinars, next 17 August
- EOSCpilot at Open Science Fair, Athens 6-8 October
- EOSCpilot Stakeholder Engagement Event
  - 28-29 November in Brussels
Q&A
