

Governance and architecture –
looking ahead to day 2

2017-11-28

EOSC_{pilot}

The European Open Science
Cloud for Research Pilot Project

www.eosc-pilot.eu

A reminder of broad goals

- Building bridges where necessary, improving them where they exist
- Between infrastructures, between domains, between levels of provision (local, national, European, global)
- ... horizontally and vertically
- Evidence of success in attendance patterns at sessions today & tomorrow

Evidence from session attendance – mixing of groups

- Taking those who attended research infrastructure session:
 - They make up 58% of soap box on service providers, RIs
 - 64% of soap box on intermediaries, libraries
 - 65% of soap box on government, funders, industry
 - 67% of those in skills session
 - 61% of those in interoperability & FAIR session
- This story continues across the analysis.

- A summary of outputs from today's sessions
- Relationship of governance to architecture
 - Ambitions
 - Challenges
 - Opportunities
- The nature of commission support for EOSC implementation
- Architecture – a 'system of systems'

.. And more

- More chances to see posters on demonstrators
 - Examples – TEXTCROWD; EPOS/VERCE virtual earthquake & computational earth science
- Parallel morning interactive sessions:
 - Architecture
 - Policy
 - Sustainability
- Parallel afternoon interactive sessions:
 - Principles of engagement
 - Portfolio management
 - Governance – advisory forum
- Wrap-up ; calls to action; cocktails
